

PROGRESS NOTE

Patient Name: John Anderson

Date: May 20, 2026

Provider: Dr. Sarah Mitchell

Chief Complaint:

Persistent low back pain radiating into the right leg for approximately four months.

History:

Patient reports worsening pain despite multiple conservative treatment measures.

Conservative Treatments Completed:

Physical Therapy: Completed from January 5, 2026 through March 12, 2026

Medication Therapy: Ibuprofen 800mg daily for 8 weeks

Home Exercise Program: Completed for 10 weeks

Current Symptoms:

Lumbar pain rated 8/10

Numbness and tingling in right foot

Reduced range of motion

Difficulty walking longer than 15 minutes

Assessment:

Chronic lumbar radiculopathy

Failure of conservative management

Concern for nerve root compression

Plan:

Recommend MRI Lumbar Spine Without Contrast to evaluate neurological involvement and determine further treatment options.
